

LEADING as always

Twin disc fertiliser spreader ZA-TS
with ArgusTwin

The automatic ISOBUS weigh-cell spreader **ZA-TS with ARGUS eyes**

ArgusTwin – Even more precision, even more comfort! Permanent monitoring of the lateral distribution. Radar sensors monitor both the left and the right spread fans. As required, the lateral distribution is automatically optimised through the delivery system.

NEW: ZA-TS now with DynamicSpread: Switch up to 128 part-width sections quickly and precisely.
